HARIS IMRAN

FRONT-END DEVELOPER

React.js • JavaScript • Tailwind CSS

PROFILE

Computer Science student with a completed ADP in Information Technology and practical experience building responsive React websites. Develops reusable interfaces, integrates APIs and manages browser-based state. Publishes projects through GitHub and Vercel. Seeking a frontend development role to contribute to real projects and build professional experience.

TECHNICAL SKILLS

Frontend React.js, JavaScript, HTML5, CSS3, Tailwind CSS

Web development Responsive design, React hooks, DOM, REST API integration, localStorage

Tools Git, GitHub, Vercel, VS Code

Foundations Python, Java, C++, basic MySQL; FastAPI project experience

SELECTED PROJECTS

Urban Bites — Restaurant Frontend

React • Tailwind CSS • localStorage • Vercel

- Built a responsive menu with search, category filters and a persistent cart with quantity controls.
- Created a rule-based food finder matching menu items to budget, dietary preference and spice level. Deployed the frontend demo through GitHub and Vercel.

[Live demo](#) | [Source code](#)

Student Life Operating System

React • Responsive UI • GitHub • Vercel

- Built a student-focused interface to organize academic activities and tasks in one place; published the project through GitHub and Vercel.

[Source code](#)

Personal Portfolio Website

Responsive web design • Frontend development

- Designed a portfolio presenting education, skills, projects and contact details with clear navigation and layouts for different screen sizes.

JARVIS — Voice Assistant

JavaScript • FastAPI • Ollama

- Connected a voice interface to a FastAPI backend and local AI tooling, implementing speech input, spoken responses and conversation status indicators.
