

HARIS IMRAN

FRONTEND DEVELOPER

Faisalabad, Punjab, Pakistan
+92 309 8011491 | itsmeharis11@gmail.com
itsmeharis56.github.io | github.com/itsmeharis56

PROFESSIONAL SUMMARY

Frontend Developer and Computer Science undergraduate specializing in building clean, dynamic, and production-ready web applications. Proficient in **React.js**, **JavaScript (ES6+)**, **Tailwind CSS**, and **Vite**, with a focus on client-side state management, custom hooks, and REST API integration. Experienced in integrating Python FastAPI backends with local AI tooling and deploying frontend platforms via Vercel and GitHub. Passionate about writing scalable, maintainable code and building high-quality digital products.

TECHNICAL SKILLS

Frontend Development:

React.js **JavaScript (ES6+)** **Tailwind CSS** **HTML5** **CSS3** **Vite**

Architecture & State:

Component-Driven Architecture, React Hooks (useState, useEffect), Client-Side State Persistence, REST API Integration, Responsive Web Design

Tools & Workflow:

Git, GitHub, Vercel, Visual Studio Code, Chrome DevTools

Backend & Languages:

Python, FastAPI, Java, C++, MySQL (Basic Database Management)

FEATURED PROJECTS

Urban Bites – Interactive Restaurant Application

[React.js](#) | [Tailwind CSS](#) | [LocalStorage](#) | [Vercel](#)

Live Demo: urban-bites.vercel.app | GitHub: github.com/itsmeharis56/urban-bites

- Engineered a responsive food ordering web application featuring real-time category filtering, instant search functionality, and modular component design.
- Implemented client-side cart persistence and quantity controls using custom React hooks and browser localStorage.
- Developed an interactive recommendation algorithm matching menu items against user-selected budget, dietary, and spice preferences.

JARVIS – Voice Assistant & Local AI Interface

[JavaScript](#) | [Python](#) | [FastAPI](#) | [Ollama](#)

GitHub: github.com/itsmeharis56/jarvis-voice-assistant

- Architected a responsive voice assistant interface connected to a Python FastAPI backend for real-time speech input processing and automated audio output.
- Integrated local Large Language Models (Ollama running qwen2.5:3b) to execute offline conversation logic and query resolution.
- Built dynamic visual audio status indicators to provide immediate feedback during voice input recognition and backend execution.

Student Life Operating System

[React.js](#) | [Tailwind CSS](#) | [Vercel](#)

Live Demo: student-life-os.vercel.app | GitHub: github.com/itsmeharis56/student-life-os

- Designed and deployed an academic management dashboard enabling students to track assignment deadlines, study tasks, and daily schedules in one interface.
- Utilized responsive design principles and utility-first CSS to guarantee seamless usability across mobile, tablet, and desktop viewports.

EDUCATION

BS in Computer Science (Bridging Program)

Government College University, Faisalabad (In Progress)

Associate Degree Program (ADP) in Information Technology

Riphah International University (Completed)

TOOLS & LANGUAGES

Design & Software: Canva, Adobe Photoshop, MS Office

Languages: English (Working Proficiency), Urdu (Native)
